HEIGHT 1.05 m	WEIGHT 115 kg	FILTRATION Sand filter

OVERVIEW

The other half of the ritual

The Brook is an oval cold tub in solid spruce, made for the moment after the heat. Its 38mm walls are held by stainless steel bands, with benches fixed inside, so you can sit and let the cold water rise to your shoulders.

A sand filter keeps the water clear between changes, and a simple outlet valve drains it when the time comes. It arrives fully assembled, ready to fill, with room for one or two.

AS STANDARD

What’s included

THE TUB	Oval spruce tub with 38mm walls and floor, held by stainless steel bands
BENCHES INSIDE	Wooden benches fixed to the walls, so it is easy to clean around
SAND FILTRATION	Keeps the water clear between changes
OUTLET VALVE	Ready for a hose, so draining is simple
CURVED STAIRS	Spruce steps with a niche that houses the sand filter
YOUR COLOUR CHOICE	Stain or paint, spray-applied in the factory

PLANNING YOUR SPACE

Site and running

BASE	A firm, level base such as gravel, chippings or flagstones. No concrete needed; air must circulate underneath.
ACCESS	The Brook arrives fully assembled, so the route needs to take 1,541 × 893 × 1,054 mm and 115 kg. We review access, route and lifting with you first.
POWER	A supply for the sand filter, confirmed at the site review.
RUNNING COST	Estimated £5–10 a month, based on typical use. No heating needed, so costs are mainly fresh water, filter running and upkeep.

JAMES’S TAKE

If you already have a sauna or a hot tub, this is the piece that completes the ritual. Heat, then cold, then that clear, settled feeling afterwards. It’s compact, arrives ready, and the filter means you’re not changing the water every few days.
