HEATING Harvia 8kW electric	WEIGHT 890 kg	WALLS 38mm Nordic spruce

OVERVIEW

The sauna in its most classic form

The Stave is the sauna in its most classic form: a Nordic spruce barrel, its rounded shape holding the warmth close. Windows in the front and back walls let the daylight through, so the garden stays with you while you sit in the heat.

An 8kW Harvia Vega heater brings the room up to temperature at the touch of a button, and soft LED lighting traces the roofline after dark. It arrives assembled or as a compact kit, with room for two to four. A small, quiet place, made for unhurried evenings.

Site and running

BASE	Level, waterproofed concrete base built to the manufacturer’s drawings. Required for the warranty.
ACCESS	Delivered fully assembled or as a compact flat-pack kit, so we can usually find a way in. We review access, route and lifting with you first.
POWER	A dedicated hard-wired circuit for the 8kW heater and lighting, installed by a qualified electrician.
RUNNING COST	Estimated £25–45 a month, based on our average customers’ monthly use. We explain the assumptions, including how often you use it, the heating method and the time of year.

JAMES’S TAKE

If you’re picturing a sauna, this is probably what you see: the classic barrel. It’s compact, it heats efficiently, and with windows at both ends it never feels closed in. It’s a lovely place to start, and it fits gardens the bigger saunas can’t.
